

NAME	73-Clear-Com Agent IC and LQ...	answer time into video	NOTES
Dave Zammit	How about TW Clearcom as per ^TWC 104 ?? on the LQ	0:15:34	
Marlon Vicente	To put an external ip on my LQ, should I ask my system engineer? or to my internet service provider? Or the external IP address should be put in the firewall?	0:18:51	
Marlon Vicente	the external ip address is what I should put in my agent-ic account? when I connect from another remote point?	0:29:32	
Michael Fraley	Is the system mac friendly?	0:33:18	
Andrew Morton	I have encountered an issue were users get dropped off Agent IC and just prior to being dropped the user name is duplicated and then they are dropped from the GUI/ system. They of course then have to relog into agent ic at that point. Have you encountered this issue before? and is there a fix or workflow to prevent this from happening? the name is seen twice on the assignments page on all the channels that the user has assigned to it	0:36:45	
Opeyeni Osunsaju	How many channels can be accommodated by agent IC?	0:39:42	
Adam Sanchez	if we change a client's configurations on the fly (while they're using the app) does it automatically update?	0:42:56	
Adam Sanchez	If i were to have, for example, IFB audio on channel 1 and a party line on channel 2, and the client were to latch the listen on channel 1 and then talk to channel 2, does the latch become cancelled in order to accomodate communications on ch 2?	0:52:13	
David Zammit	For Pete... https://www.tenorshare.com/iphone-tips/ios-emulator-for-pc-mac.html	1:20:10	
Palmer Jenkins	What is the average latency of the system?	1:05:55	
Wynn Johnson	if you are listneing to multiple channels, is there a visual indication of which one actually have in-comming signal? if someone is being rude on a channel how can i tell which of my channels it is?	1:07:55	
Adam Fedock	Can you show an example of how to hook a channel to a 2-way radio? What would that Agent IC config look like?	0:59:17	
Adam Sanchez	can Agent IC accomodate remote triggering from a headphone ptt button, for example?	1:08:42	
Huimin Li	What other differences are there between Agent IC for LQ and EHX?	1:11:37	
John Christie	Pete, there are a bunch of ios emulators or simulators out there. Most of them are designed for people to test ios apps on a mac. Try app.io or iPadian.	1:16:02	
Derek Chandler	Can you place two instances of a single channel so a specific user could have "front page" access to all assigned channel parameters without toggling to second page	1:16:22	

Palmer Jenkins	Got it - so if you reply with your voice "from the beach" will your speaking be heard on the local system whenever it arrives (possibly on top of someone speaking in real time)?	1:17:55	
Odeyemi Ogunsaju	Where can we source this phone?		https://www.sonimtech.com/
Stan Hunter	What model is your Sonim phone	1:20:24	XP8
Derek Chandler	Do you lose access to ports when resource monitor gets too high	1:22:26	
Alfred Tetzner	Is it possible to pre-program a setup on a laptop, download to a thumbdrive, load to another device	1:26:22	
Adam Sanchez	and is there a forum or resource for seeing what patches come out when they come out?	1:29:09	
Derek Chandler	could the resource be the issue of previous question with peeps getting dropped off??	1:30:09	
Alfred Tetzner	Rom, thank you. Fingers crossed for the busy little beavers. Time is always a premium on site.	1:31:57	
Adam Sanchez	in a given session, can you save a configuration to 'revert to saved' in the instance that you aren't happy with your changes?	1:34:55	
Stan Hunter	license costs and use time frame	1:36:53	agentIC ~400/ client - perpetual
Alfred Tetzner	Much to ingest. Thank you for the detail.		
	Is it possible to pre-program a setup on a laptop, download to a thumbdrive, load to another device	1:45:58
