

NAME	84 - How to Protect your crew in Covid-19	answer time into video	NOTES
Paul Goldman	On the projects you have worked on, during Covid, how were safety protocols implemented with local labor?	0:26:05	
Paul Goldman	Are there basic protocols that are consistent across all shows (i.e. Masks, Distancing, Hygiene, Testing, Tracing)?	0:27:41	
Pete Erskine	Usually in a show safety meeting the crew is cautioned "if you see something, say something" how about when a person comes on a set without a mask...what should someone do, particularly if they won't wear a mask....	0:44:38	
Chris Olson	I am assuming that for the NBA had a OB truck and it was ok because it was in the bubble. How have you seen other OB trucks set up. Seems not possible to distance.	0:46:38	
Paul Goldman	How much does one of the MT Cases cost (ballpark)?	1:23:00	
Paul Bevan	Do you know anyone who is renting UV equipment?	1:28:49	Firehouse
Tim McCulloch	There were 2 presentations at the AES convention One in Broadcast, the other in sound reinforcement		
Pete Erskine	Who makes or supplies the covid spacing tracking devices on NBA		
Justin Herminghouse	There seems to be a very strong focus on managing the risk of transmission from surfaces. Is anyone developing standards or protocols around airflow / ventilation / filtration for work areas / control rooms / trucks, etc.?	1:35:33	
Tim McCulloch	the most variation Denise Woodward found was on console cleaning; only Avid recommended UV-C and BZK (quaternary ammoniums) wipes. Yammy said "soap and water". DigiCo doesn't like much of anything esp on the touch screens.'	1:42:01	
Paul Bevan	Thanks everyone - this was amazing. I have a 3 week opera gig in February and am a little clearer about what I have to do and what to expect of the producers.		
Tim McCulloch	They tested UV-C with favorable results		
Tink Abraham	No questions but Thanks - Great information!!		
John Sulek	Thanks very much for sharing all your hard won research!		
Ryan Trefethen	Did you use the Oxivar to wipe down Comms beltpacks and headsets?	1:45:36	
Don Hartley	Thank you for sharing. Have a great weekend!		
Lorin White	Cheers All!		
Ryan Trefethen	Thanks Pete. Great webinar. I'm onsite and this is all quite helpful.		
Fred Domenigoni	What is the percwntage of the active ingredient?		
Tink Abraham	Thanks guys - great info!
